

Kaz Imai's Hobbies

- I am enjoying in Listening analog record through Tube pre-amplifier and Tube Power amplifier.
- Both of them are Golden Tube Audio SEP-1 and SE-100. They are currently under overhaul by specialist company. I may look for a new tube amplifier! After some period of overhauling SE-100, I discovered this may not be a good idea so I have decided to destroy it and bought new tube amplifier, made by Cayin model Venus VP-100i.
- This amplifier has UL and triode connection changed by a switch. Max Power is 50Wx2 (UL) and 24W(Triode) using KT-88x4 with AB1 PP. Other tubes are 6SL7x2 and 6SN7x3 with 30.5kg weight. The tube preamplifier SEP-1 has been repaired and is working.
- The current phono cartridges I have been using are; Ortofon SPU Classic, Ortofon Cadenza, Denon DL-103 (all of them are MC Cartridges) and Grace M-8 with Marantz record player. The equalizer amplifier is Ortofon EQA-555MKII.
- The Speaker is made in USA by Sony Model M-7

I am learning to play Alto Sax made by Selmer.
